MCBs

MCBs MINIATURE CIRCUIT BREAKERS

WOODWHITE MCB's PROTECT AGAINST OVERLOAD AND SHORT CIRCUITS

OVERLOAD PROTECTION

This is achieved by thermal operation of the bimetal strip which deflects when heated by the over current passing through it, thereby tripping the operating mechanism and causing the contact to open.

THERMOSTATIC BI-METAL

It is a composite material comprising of two metallic layers of different co-efficients of thermal expansion. These are permanently bonded together by pressure welding.

SHORT CIRCUIT PROTECTION

In an event of short circuit, the high current - in the range of kA, energises the solenoid and a magnetic field is created. Due to this magnetic field, the anchor is pulled down which pushes the plunger to strike the inner latch causing instantaneous opening of the contacts.

DBs DISTRIBUTION BOARDS

PRESENTING REVOLUTIONARY DBS THAT ENSURE YOU WILL ALWAYS BE ON THE SAFE SIDE

WoodWhite makes Great Distribution Boards that provide flexibility & are a systematic approach to the ever increasing need for effective methods of the electrical distributions in domestic, commercial and industrial applications. WoodWhite Distribution Boards have been specially designed to meet all the technical requirements and ensure that the Distribution Boxes blend well with any decor. Distribution Boards, with their features and their unique range offer a compact, practical and economic solution to any electrical network in residential, commercial complexes, industries etc. having single phase or three phase connections. Distribution Boards are not merely an enclosure but a complete system in itself comprising of Copper bus bar, brass neutral link, earth link, earthling studs, and interconnection wires for effective distribution of current.

FR

Multistrand Single Core Unsheathed Flexible Industrial Cables

FR wires, multi-strand flexible FR PVC Insulated building wires with fire retardant properties. The conductor is insulated with a specially formulated Flame Retardant FR grade PVC Compound having high insulation resistance, oxygen, temperature index and dielectric strength, which prevents the leakage of electric current. Suitable for use in surface mounted or embedded conduits or trunking. Also ideal for field protected installation in lighting fittings and inside appliances.

PVC Twin-Twisted

Flexible Wire

Flexible wire is commonly used for temporary connection to fulfill domestic & commercial single point need. Safety aspect may be ignored by users when temporary connections are taken. In such situations, SAFETY being a prime concern for Woodwhite, we are introducing high quality of Flexible Wire.

Features & User:

- 100% electrolytic grade copper
- FR PVC insulation
- Ideal for single connection & decorative lights

Ease Of Wiring

Instead of buying two wires for Live and Neutral lines, T/T Wires are much more convenient.

Cost-Saving

PVC T/T wires offer a pocket-friendly but reliable wiring solution toyour temporary electrical requirements.

Suited for Temporary Wiring

Twin-Twisted Flexible Wires can be used as a simple solution to povide a temporary power supply for lighting the bulb and making connections across fans, festival lights, etc.

WOODWHITE®
"A NAME YOU CAN TRUST"

3 Core Flat Submersible Cables

PVC Insulated and Sheathed for Submersible Use

3-Core Flat Submersible Cable consists of 3 insulated cores, which are laid next to each other and sheathed with black PVC. These cables are specially designed for underwater use or in damp environments. They are used to connect underwater submersible pump sets to power supply lines in the agriculture, irrigation, domestic & outdoor sectors.

Woodwhite manufactures Submersible Cables with excellent insulation so that they are not affected by chemical, greasy, or liquid particles. It can withstand the adverse conditions of a humid environment. Thanks to the top-quality copper conductor cores, Woodwhit submersible cables offer the best performance at an affordable price point.

3 CORE FLAT SUBMERSIBLE COPPER WIRE

LONGER SERVICE LIFE

PVC Aluminium Wires

Single Core 1100V PVC Insulated Wires with Aluminium Conductor

Woodwhite Alu-Line single core building wires are manufactured using bright electrolytic grade aluminium, delivering 64% conductivity. The wires are drawn and annealed into a circular conductor which has consistent resistance and is also compact. The insulation of the wires is made from a special grade of UV -resistant PVC compound and can withstand harsh weather conditions, providing higher electrical safety.

Twin-Parallel Flat Cables

PVC Insulated and Sheathed for Submersible Use

Twin Parallel Flat Cable consists of two-conductor cores that are insulated with PVC compound and mainly used for supplying power for household and industrial applications. They are manufactured using bright electrolytic copper conductors that offer high conductivity, flexibility, and uniform resistance. They also have a fine gap between the two cores, which is taken up by the PVC insulation. It affixes both the insulated cores parallel and can be torn to create two flexible ends of copper wires.

Exceptional Features

PVC Insulation Tape, with its outstanding PVC film and specialized adhesive, delivers unparalleled value!

PREMIUM QUALITY

Leak-Proof : With optimal adhesive loading, there is no leakage/spilling of it from the sides of the tape.

Non-Sticky Adhesive : The specialized adhesive does not leave any sticky residue on the surface after removal.

Pinhole-Free : The tape is highly resistant to pinholes and tearing preventing shocks and mishaps due to wire strands pricking out of the tape.

- Fire Retardant
- Resistance To Abrasion
- High Elasticity
- Superior Adhesive
- Withstands upto 6000V AC

Specifications			Code: WEIT196
Length	7.0 meter	Di-Electric Strength (RT)	40 kV/mm
Thickness	0.125 ± 0.025 mm	Di-Electric Strength (Humid)	35 kV/mm
Backing	PVC	Flammability	Self-Extinguishing
Adhesive	Rubber-Based	Insulation Resistance	10^5 MΩ/25 mm width
Adhesion to Backing	1.3 N/10 mm width	Elongation at Break	>150%
Tensile Strength*	40 N/10 mm width	Operating Temperature	0-80°C

*per mm thickness

FR-PVC Electrical Insulation Tape 0.125mm x 17mm x 7.0mtrs.
